SUBJECT INDEX

Blood banking

Type and screen: Seven steps to success. January 85
Viewpoint: The reality of the second-string blood banker. March 21
Disaster blood usage: A case history. July 96
Telethon reaps pledges of blood, not money. October 43
The day the blood supply almost stopped. October 76
Marketing strategies for the nonprofit blood center. October 112

Career development

Viewpoint: Tomorrow's technologist: Not likely to be a jack-of-all-trades. January 21
Building a career ladder for the upward climb. January 72
Reflections: The assistant supervisor: A vital team player. January 103
Preparing for a potential personnel shortage. February 80
Reflections: Is our profession turning out dinosaurs? February 105
Washington report: HHS schedules latest—perhaps last—proficiency exam for October. March 27
An experiment in staff development. April 75
A close-up look at the CLT proficiency exam. May 59
The goal-oriented job evaluation. June 32
Detailing and quantifying job performance. June 41
We have an image problem. August 32
Shoring up a shaky image. August 41
A look at the high attrition rate among technologists. August 52
An earthshaking alternate career path. August 73
Dress up the profession. August 91
Reflections: Remembrances of a lab boyhood. September 141
Viewpoint: Doom, gloom, and more doom. October 21
The 10 commandments of laboratory coaching. November 54
Let's build job satisfaction into the MT curriculum. November 98
Reflections: Educating pathologists for the real world. November 108

Certification and licensure

Viewpoint: Tomorrow's technologist: Not likely to be a jack-of-all-trades. January 21
Reflections: Is our profession turning out dinosaurs? February 105
Washington repost: HHS schedules latest—perhaps last—proficiency exam for October. March 27
A close-up look at the CLT proficiency exam. May 59
Reflections: Can we solve the certification dilemma? June 103
We have an image problem. August 32
Shoring up a shaky image. August 41
Improving our professional credibility. September 125

Communication

Using quality circles to spot and solve lab problems. February 32
How to avoid computer shock. February 71
Games microbiologists play. February 89
How to lead a problem-solving meeting. March 51
How we reduced identification errors. March 95
From technologists to talk-show stars. March 111
Techs, tots, and fingersticks—without tears. April 104
Getting at the roots of laboratory stress. April 115
A statewide survey to measure CE needs in microbiology. April 127
The lab on-line with a vast data bank. May 66
Breaking the back of Stat abuse. June 48
Guide to a good management library. June 57
You can't motivate unless you communicate. July 89
Disaster blood usage: A case history. July 96
A tool for better lab-medical staff relations. July 109
How to cope with frustration—yours and others'. July 121
Reflections: The last word: Self-discovery. July 136
We have an image problem. August 32
Shoring up a shaky image. August 41
Troubleshooting lab-nursing service problems. August 80
Dress up the profession. August 91
Plugging the lab into a computer network. September 73
An overall laboratory communication plan. September 79
Telethon reaps pledges of blood, not money. October 43
Does your lab need an employee liaison committee? October 61
Making the most of supervisors' meetings. October 97
Marketing strategies for the nonprofit blood center. October 112
This city's supervisors share their problems and resources. November 89
The winners of MLO's Article Awards Contest. November 103
Therapeutic drug consultations based in the lab. December 88

Continuing education

Building a career ladder for the upward climb. January 72
Games microbiologists play. February 89
Continuing education records made easy. February 97

Subject Index

Washington report: HHS schedules latest—perhaps last—proficiency exam for October. March 27
An experiment in staff development. April 75
A statewide survey to measure CE needs in microbiology. April 127
A close-up look at the CLT proficiency exam. May 59
Guide to a good management library. June 57
Improving our professional credibility. September 125
Continuing education by technologists for physicians. November 79

Data processing
Designing tomorrow's laboratory today. January 94
How to avoid computer shock. February 71
Computer selection for the non-computer expert. April 63
The lab on-line with a vast data bank. May 66
Growing leaner: A cost-cutting strategy. May 89
Emerging developments in laboratory technology. September 34
Plugging the lab into a computer network. September 73
Updating your laboratory computer. October 69
Mark sense makes sense in microbiology. October 126

Ethics
Viewpoint: When imminent death is inevitable. August 21
Viewpoint: Protect us from those who seek to protect us. September 21
Genetic screening: A medicolegal time bomb? September 55
The pathologist who blew the whistle on unnecessary surgery. October 32

Financial management
Washington report: Hospitals face radical new cost rules. January 27
Alternatives to hospitals: A look at the growing competition. January 32
Ambulatory care centers: Off and running. January 39
After care: Shortening the hospital stay. January 47
Alternative care: The increasing clout of HMOs. January 53
Cost containment: The squeeze gets tighter. March 32
Cost containment: Tactics for the 80s. March 41
Caution on the slippery road to competitive bidding. March 57
The impact of nonrevenue-producing activities. March 81

Cost containment: Why not try an idea bank? March 105
Surviving prospective reimbursement: Which way will laboratories go? April 32
Time for a price strategy. April 43
Washington report: Prospective payment zips through Congress, takes effect Oct. 1. May 27
Is this test really necessary? May 32
What the new Medicare rules mean to pathologists. May 50
Growing leaner: A cost-cutting strategy. May 89
Now a strategy to seize new outpatient opportunities. June 63
Steering the lab through the risks of reimbursement. June 91
Learning to live with DRGs: The New Jersey experience. July 34
The challenges facing hospitals and their labs. July 63
Washington report: Congress now shifts payment focus to independent labs. September 27
Viewpoint: Doom, gloom, and more doom. October 21
Washington report: HCFA task force recommends national fee schedule for independent labs. October 27
Test cost analysis: More vital than ever. October 51
How to evaluate a manufacturer's commitment to cost containment. October 83
Ready or not, prospective payment is here. October 90
Washington report: Medicare poised to try competitive bidding for lab tests in '84. November 27
The cluster lab: A model for the DRG era? November 40
Timely lessons from a prepaid group practice lab. December 55

Government relations
Washington report: Lab groups must be wary of restraint-of-trade actions. February 27
Washington report: Not many concessions in HCFA's final pathologist payment rules. April 27
Surviving prospective reimbursement: Which way will laboratories go? April 32
Time for a price strategy. April 43
Washington report: Prospective payment zips through Congress, takes effect Oct. 1. May 27
What the new Medicare rules mean to pathologists. May 50
Washington report: CAP sues U.S. over "devastating" reimbursement rules. June 27
Steering the lab through the risks of reimbursement. June 91
Washington report: CAP loses Round 1 of reimbursement battle. July 27
Learning to live with DRGs: The New Jersey experience. July 34
Washington report: Congress now shifts payment focus to independent labs. September 27
Washington report: HCFA task force recommends national fee schedule for independent labs. October 27
Ready or not, prospective payment is here. October 90
How one state lab group made a difference. October 105
Washington report: Medicare poised to try competitive bidding for lab tests in '84. November 27
Washington report: CAP vs. HCFA: What constitutes a pathology consultation? December 27

Inspection and accreditation
Office lab accreditation? It's easier than you think. December 69

Instruments
Acquiring basic instrument troubleshooting skills. July 129
Emerging developments in laboratory technology. September 34
Keeping your instruments happy. November 32

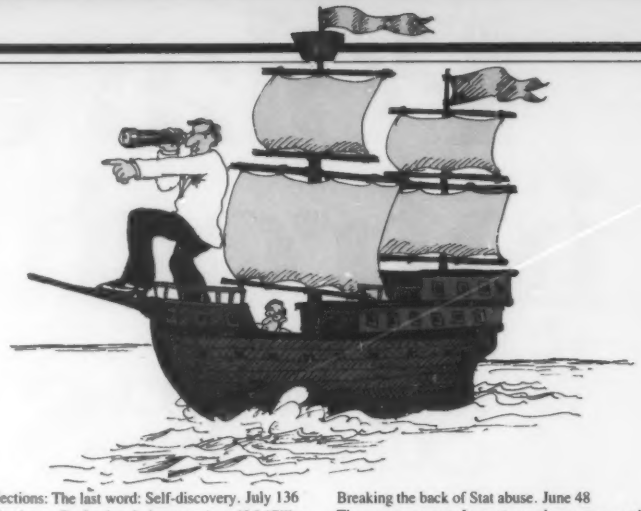
Laboratory of the future
Designing tomorrow's laboratory today. January 94
Reflections: Is our profession turning out dinosaurs? February 105
Surviving prospective reimbursement: Which way will laboratories go? April 32
Now a strategy to seize new outpatient opportunities. June 63
The challenges facing hospitals and their labs. July 63
Emerging developments in laboratory technology. September 34
The cluster lab: A model for the DRG era? November 40
Reflections: 1984: A radically new year in the laboratory. December 123

Legal problems
Washington report: Lab groups must be wary of restraint-of-trade actions. February 27
Washington report: CAP sues U.S. over "devastating" reimbursement rules. June 27
Washington report: CAP loses Round 1 of reimbursement battle. July 27
Viewpoint: Protect us from those who seek to protect us. September 21
The crucial protocol for prenatal AFP screening. September 43
Genetic screening: A medicolegal time bomb? September 55
The pathologist who blew the whistle on unnecessary surgery. October 32
Washington report: CAP vs. HCFA: What constitutes a pathology consultation? December 27
Viewpoint: Hepatitis B vaccine for lab personnel? December 21

Maintenance
Acquiring basic instrument troubleshooting skills. July 129
Keeping your instruments happy. November 32

Management techniques
Situational leadership: Flexibility is the key. January 62
Using quality circles to spot and solve lab problems. February 32
Is your lab ready for quality circles? February 41
Using blood culture data as a management tool. February 49
Cost containment: The squeeze gets tighter. March 32
Cost containment: Tactics for the 80s. March 41
How to lead a problem-solving meeting. March 51
How we reduced identification errors. March 95
Pathologists must delegate—not abdicate. April 55
Reflections: Be a mover, not just a doer. April 136
Is this test really necessary? May 32
You can change self-defeating attitudes. May 79
For better performance, try applied job descriptions. May 101
The goal-oriented job evaluation. June 32
Detailing and quantifying job performance. June 41
Guide to a good management library. June 57
The challenges facing hospitals and their labs. July 63
You can't motivate unless you communicate. July 89
How to cope with frustration—yours and others'. July 121

Subject Index



Reflections: The last word: Self-discovery. July 136
Time management: Learn to work smarter, not harder. August 106
Pay raises: Merit or seniority? September 63
An overall laboratory communication plan. September 79
A guide to progressive disciplinary measures. September 93
Giving and handling criticism. September 101
Does your lab need an employee liaison committee? October 61
Ready or not, prospective payment is here. October 90
Making the most of supervisors' meetings. October 97
No one catches this second shift off guard. October 141
Reflections: Planning and people: A winning combination. October 155
The 10 commandments of laboratory coaching. November 54
Bayesian analysis: An objective approach to hiring. November 63
This city's supervisors share their problems and resources. November 89
Reflections: Educating pathologists for the real world. November 108

Patient relations

Techs, tots, and fingersticks—without tears. April 104
Viewpoint: Volunteers: Keeping the heart in health care. May 21
Don't overlook phlebotomy QC. June 73
Risk factors: Fact or fallacy? July 45
Viewpoint: When imminent death is inevitable. August 21
Viewpoint: Protect us from those who seek to protect us. September 21
Rx for the elderly: A little time and tenderness. September 132
Group practice labs: How and why they're growing. December 32
Group practice labs: The future and the competition. December 43

Personnel management

Situational leadership: Flexibility is the key. January 62
Building a career ladder for the upward climb. January 72
Reflections: The assistant supervisor: A vital team player. January 103
Build productivity into your work environment. February 62
Preparing for a potential personnel shortage. February 80
Reflections: Let's take a closer look at the supervisor's role. March 117
An experiment in staff development. April 75
Getting at the roots of laboratory stress. April 115
How to groom a new supervisor. May 41
You can change self-defeating attitudes. May 79
For better performance, try applied job descriptions. May 101
Reflections: Plotting a course for laboratory improvements. May 116
The goal-oriented job evaluation. June 32
Detailing and quantifying job performance. June 41
Don't overlook phlebotomy QC. June 73
You can't motivate unless you communicate. July 89
How to cope with frustration—yours and others'. July 121

Reflections: The last word: Self-discovery. July 136
Reflections: Professional image: A self-fulfilling prophecy. August 115
Pay raises: Merit or seniority? September 63
A guide to progressive disciplinary measures. September 93
Giving and handling criticism. September 101
Viewpoint: Doom, gloom, and more doom. October 21
Does your lab need an employee liaison committee? October 61
A systematic guide to understanding behavior. October 133
Reflections: Planning and people: A winning combination. October 155
The 10 commandments of laboratory coaching. November 54
Bayesian analysis: An objective approach to hiring. November 63

Let's build job satisfaction into the MT curriculum. November 98
Performance appraisals: Beware the numbers game. December 79
A do-it-yourself approach to scheduling. December 99

Planning

Time for a price strategy. April 43
Growing leaner: A cost-cutting strategy. May 89
Reflections: Plotting a course for laboratory improvements. May 116
Now a strategy to seize new outpatient opportunities. June 63

Reflections: Planning and people: A winning combination. October 155

Problem solving

Using quality circles to spot and solve lab problems. February 32
Is your lab ready for quality circles? February 41
How to lead a problem-solving meeting. March 51
Making the most of supervisors' meetings. October 97
Viewpoint: No name, no fame for an important testing principle. November 21

Productivity

Build productivity into your work environment. February 62
The impact of nonrevenue-producing activities. March 81
Surviving prospective reimbursement: Which way will laboratories go? April 32

Time for a price strategy. April 43
Is this test really necessary? May 32
Growing leaner: A cost-cutting strategy. May 89

Breaking the back of Stat abuse. June 48

Time management: Learn to work smarter, not harder. August 106

Emerging developments in laboratory technology. September 34
Plugging the lab into a computer network. September 73

An overall laboratory communication plan. September 79
Viewpoint: Doom, gloom, and more doom. October 21

Mark sense makes sense in microbiology. October 126
The cluster lab: A model for the DRG era? November 40

Professional relations

Alternatives to hospitals: A look at the growing competition. January 32
Ambulatory care centers: Off and running. January 39
After care: Shortening the hospital stay. January 47
Alternative care: The increasing clout of HMOs. January 53
Pathologists must delegate—not abdicate. April 55
Is this test really necessary? May 32
What the new Medicare rules mean to pathologists. May 50
Growing leaner: A cost-cutting strategy. May 89
Learning to live with DRGs: The New Jersey experience. July 34
A tool for better lab-medical staff relations. July 109
We have an image problem. August 32
Shoring up a shaky image. August 41
A look at the high attrition rate among technologists. August 52
Troubleshooting lab-nursing service problems. August 80
Reflections: Professional image: A self-fulfilling prophecy. August 115
Improving our professional credibility. September 125

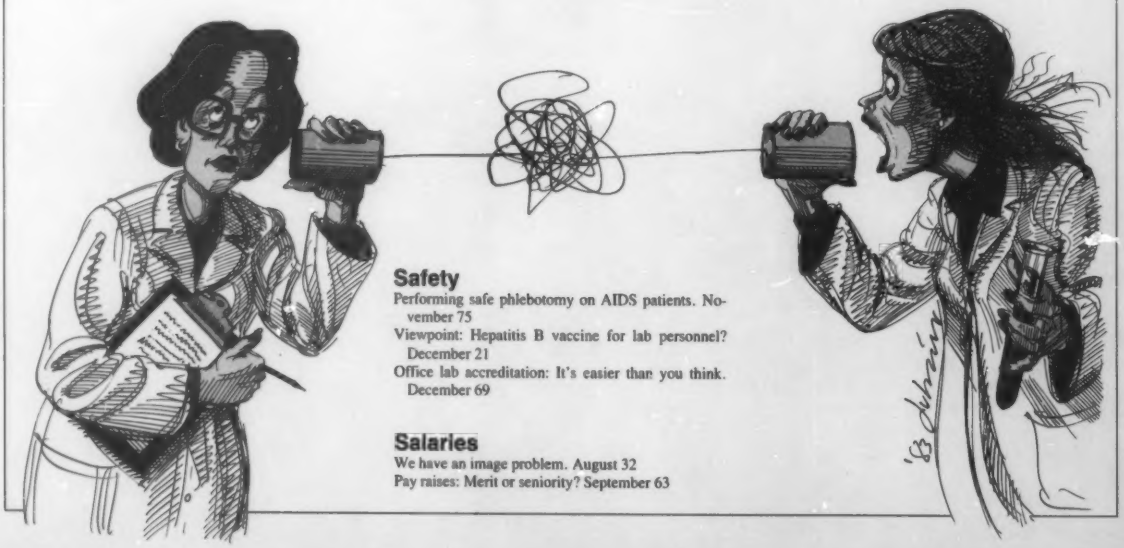
Learning to live with DRGs: The New Jersey experience. July 34
The challenges facing hospitals and their labs. July 63
Washington report: FDA lifts restrictions on AFP test for fetal screening. August 27
Washington report: Congress now shifts payment focus to independent labs. September 27
Washington report: HCFA task force recommends national fee schedule for independent labs. October 27
Ready or not, prospective payment is here. October 90
How one state lab group made a difference. October 105
Washington report: Medicare poised to try competitive bidding for lab tests in '84. November 27
Washington report: CAP vs. HCFA: What constitutes a pathology consultation? December 27

Staffing

Washington report: Hospitals face radical new cost rules. January 27
Viewpoint: Doom, gloom, and more doom. October 21
Ready or not, prospective payment is here. October 90
No one catches this second shift off guard. October 141
The cluster lab: A model for the DRG era? November 40
Bayesian analysis: An objective approach to hiring. November 63
A do-it-yourself approach to scheduling. December 99

Technical procedures

Type and screen: Seven steps to success. January 85
Viewpoint: When to evaluate hemostasis. February 21
Viewpoint: Can urinalysis reclaim its place in our hearts? April 21
Is this test really necessary? May 32
Growing leaner: A cost-cutting strategy. May 89
Viewpoint: Daft and deft questions about urinalysis. June 21
Now a strategy to seize new outpatient opportunities. June 63
Viewpoint: High time to end antenatal D^u testing. July 21
Fast track for monoclonal antibodies. July 53
Guidelines for evaluating and introducing new tests. July 75
Emerging developments in laboratory technology. September 34
The crucial protocol for prenatal AFP screening. September 43
Genetic screening: A medicolegal time bomb? September 55
Microbiology gears up for prospective payment. September 108
Viewpoint: No name, no fame for an important testing principle. November 21
Performing safe phlebotomy on AIDS patients. November 75
Timely lessons from a prepaid group practice lab. December 55
Therapeutic drug consultations based in the lab. December 88



Safety

Performing safe phlebotomy on AIDS patients. November 75
Viewpoint: Hepatitis B vaccine for lab personnel? December 21
Office lab accreditation: It's easier than you think. December 69

Salaries

We have an image problem. August 32
Pay raises: Merit or seniority? September 63

Training programs

Viewpoint: Tomorrow's technologist: Not likely to be a jack-of-all-trades. January 21
Building a career ladder for the upward climb. January 72
Preparing for a potential personnel shortage. February 80
Reflections: Is our profession turning out dinosaurs? February 105
A part-time MT degree program for the 1980s. March 67
An experiment in staff development April 75
How to groom a new supervisor. May 41
Don't overlook phlebotomy QC. June 73
Guidelines for teaching in the laboratory setting. June 85
A look at the high attrition rate among technologists. August 52

MANAGEMENT Q & A INDEX

Budget

Expenditure approvals in a tight economy. April 146
Faulted on planning when costs run under budget. June 107
Angered at paying higher prices than other labs. November 111
Mandatory CE to avoid budget cuts. December 130

Career advice

Update on management certification. February 111
Job mobility between co-directed labs. July 141
Questions about new BB certification. August 120
What a young MT needs to get ahead these days. November 114

Communication

Frequency of updating disaster plans. January 105
To keep specimens from going astray. January 107
How to counter bad word of mouth? February 114
Screening out duplicate test orders. March 119
Responsibility for failing to flag abnormal results. April 143
Do turnaround lists deter phone calls? April 144
Don't touch that dial, at least not in the lab. April 144
Explaining high bills for lab tests. May 114
Night technologist fields clinical questions. July 142
When to report unordered results. July 142
Calming patients about phlebotomy trainees. September 151
Director keeps problems under wraps. September 151
Faulty follow-through on standing test orders. October 159
Supervisors have lots of gripes, no suggestions. November 111

Continuing education

Skip CE travel allowance and pad the pay? March 122
Where to find material for in-services. October 160
Insists employees read technical literature. December 128
Mandatory CE to avoid budget cuts. December 130

Delegation

Finding the time to "stretch" employees. July 145
When delegated work becomes a burden. October 162
Hospital duties tie up administrator. November 112

Developing employees

Beyond brainstorming: Quality circles. January 106
Savvy by younger and older clinicians. March 120
Finding the time to "stretch" employees. July 145
How much hope to give a candidate for promotion. August 120
What a young MT needs to get ahead these days. November 114
Takes over for "slow" employees. December 127

Discipline

One tech's ups and downs affect productivity. March 122
Smokers who quit only for inspections. March 122
Disciplinary action: Public or private? May 109
Bringing pilferage under control. July 145
Must one section match another's crackdown? October 159
New manager confronts lab parties. October 159
Whether to ban a second language at the bench. October 162

Hiring and firing

Is it legal to lay off only top earners? January 107
Getting the plain truth from a job reference. April 143
When you anticipate a resignation. June 110
Who stays, who goes in a merger of labs? August 119
Job interviewer stymied by dishonorable discharge. September 149
Can a lab afford a handicapped employee? November 112

Housekeeping

Don't touch that dial, at least not in the lab. April 144
Bringing pilferage under control. July 145
Must one section match another's crackdown? October 162

Interdepartmental relations

Divided loyalties between the lab and the hospital. January 106
To keep specimens from going astray. January 107
Reward complainer with fast turnaround? February 111
Responsibility for failing to flag abnormal results. April 143
Do turnaround lists deter phone calls? April 144
Clinician wants testing by a certain tech. July 141
Manager tagged with unpopular policies. July 141
Night technologist fields clinical questions. July 142
Must one section match another's crackdown? October 162

Labor relations

When a union employee cites past practice. June 108

Legal

Is it legal to lay off only top earners? January 107
Responsibility for failing to flag abnormal results. April 143
Liability in overriding refusal of transfusion. May 110
Safeguarding information in personnel files. June 107
Hospital lawyer blocks reagent rentals. July 142
Bringing pilferage under control. July 145
Caught in the crossfire of conflicting lab regs. September 144
Is it slander to report a possible drinking problem? October 160

Morale

One tech's ups and downs affect productivity. March 122
When teamwork declines in management by objectives. April 146
When the boss ridicules hospital rules. May 109
Effect of mourning on job performance. May 110
New manager confronts lab parties. October 159
Gifts from employee trouble a supervisor. November 114

Motivation

Negative peer pressure slows hard workers. May 114
Finding the time to "stretch" employees. July 145

New supervisor

New manager confronts lab parties. October 159
Gifts from employee trouble a supervisor. November 114
Takes over for "slow" employees. December 127

Part-timers

Part-timers also deserve job evaluations. June 108

Patient relations

Who bears test cost if the patient doesn't fast? April 146
Liability in overriding refusal of transfusion. May 110
Explaining high bills for lab tests. May 114
Calming patients about phlebotomy trainees. September 151

Planning

Do turnaround lists deter phone calls? April 144
When teamwork declines in management by objectives. April 146
Excessive testing in a teaching hospital. May 110
Inpatient, outpatient testing priorities. May 114

Management Q & A, Tips, Washington Report Index

Faulted on planning when costs run under budget. June 107
Test volume in the 1990s: Higher or lower? August 119

Problem employee
One tech's ups and downs affect productivity. March 122
Smokers who quit only for lab inspections. March 122
Effect of mourning on job performance. May 110
Negative peer pressure slows hard workers. May 114
Is it slander to report a possible drinking problem? October 160
Gifts from employee trouble a supervisor. November 114
"Activist" technologist. December 130

Problem supervisor
When one supervisor lures another's employees. January 105
Proving the chief tech is sink testing. March 120
When the boss ridicules hospital rules. May 109
Manager tagged with unpopular policies. July 141
Director keeps problems under wraps. September 151
Supervisors have lots of gripes, no suggestions. November 111
Boss insists on test but won't train staff. December 127
Insists employees read technical literature. December 128

Professionalism
Technologists don't want to be called technicians. April 143
Don't touch that dial, at least not in the lab. April 144
Blow the whistle on rude inspector? August 119

Quality control
High QC expenses in a small lab. January 105
Proving the chief tech is sink testing. March 120
Responsibility for failing to flag abnormal results. April 143
Safeguarding quality under centralized purchasing. May 109
Staff cutbacks threaten accuracy. June 110
Faulty follow-through on standing test orders. October 159

Safety
Frequency of updating disaster plans. January 105
Smokers who quit only for inspections. March 122
Don't touch that dial, at least not in the lab. April 144
AIDS: Precautions the lab can take. September 144

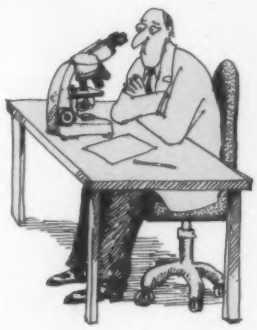
Salaries
Suspicious about an overtime pattern. February 111
Pay disparity between different credentials. March 119
Succeeding a manager who had a pay subsidy. June 107
Social Security required at nonprofit hospitals. October 159
Scale thwarts manager's raise. November 111
Does promise of a raise hold when chiefs change? November 112

Staffing
A manageable staff size for the line supervisor. February 114
Approaches to Stat lab staffing. March 119
Savvy by younger and older clinicians. March 120
Staff cutbacks threaten accuracy. June 110
Who stays, who goes in a merger of labs? August 119
Can a lab afford a handicapped employee? November 112
Evening employees pull more weekend duty. December 128
Ground rules for shift trading. December 128

Supplier relations
How instrument rentals and leases differ. January 106
Hospital lawyer blocks reagent rentals. July 142
Angered at paying higher prices than other labs. November 111

Training
Students as a drag on turnaround time. January 107
Calming patients about phlebotomy trainees. September 151
Boss insists on test but won't train staff. December 127

Workload management
Suspicious about an overtime pattern. February 111
Screening out duplicate test orders. March 119
Excessive testing in a teaching hospital. May 110
Charge extra for timed tests? June 108
When to report unordered results. July 142
Appraisal based on workload units barred. December 127



TIPS ON TECHNOLOGY INDEX

Acinetobacter anitratus: February 15
Aerosolized aminoglycosides: January 17
Agglutinin, febrile: April 15
Aminoglycoside levels: May 13
Antiglobulin test, direct: February 15, April 13
Antinuclear antibody: September 16
Arterial line blood specimens: December 17
Arterial blood counts: June 13
Bilirubin, direct: July 14
Bilirubins, neonatal: August 13
Blood counts, arterial: June 13
Blood cultures: March 13, November 13
Blood glucose determinations: December 13
Butterfly/syringe blood collection technique: June 13
Carbon monoxide toxicity: March 15
CEA testing: November 15
Cell counts on joint fluids: August 15
Centinormalized units: March 17
Chemistry dilutions: July 17
Cholinesterase testing: November 15
CK isoenzymes: June 13
Coagulation testing, plasma preparation for: October 13
Collection of microbiology specimens: January 15
Contamination from indoor plants: July 17
Contamination, potassium: February 17
Contamination, protein: September 13
Cost containment in microbiology: May 15
CPK and LDH isoenzymes: September 16
Diagnosing fat embolism: January 13
Diagnosis of lupus: December 17
Diagnosis of malaria: October 15
Dilution factor in T_4 testing: December 13
Dilutions in chemistry: July 17
Direct antiglobulin test: February 15, April 13
Direct bilirubin: July 14
Drug levels, peak: February 13
Electrolytes, stool: April 13
Fat embolism, diagnosis of: January 13
Febrile agglutinin tests: April 15
Fetal well-being: September 13
Gamma counter calibration: July 13
Hematology quality control: December 15
Hemoglobin determinations: January 15
Isoenzymes: June 13, September 16
IUD and *Actinomyces:* October 17
Joint fluids, cell counts on: August 15
LE cell test: August 15
Leptothrix vaginalis: December 15
Lipemia and hemoglobin determinations: January 15
Lupus, diagnosis of: December 17
Macroscopic analysis of urine: January 13
Malaria, diagnosis of: October 15
Microbiology, cost containment: May 15
Microbiology, specimen collection: January 15
Multiple blood cultures: March 13
Myeloperoxidase stain: March 13
Negative direct antiglobulin test: February 15
Neonatal bilirubins: August 13
Peak drug levels: February 13
Phenylketonuria: February 13
Platelet counts: November 17
Potassium contamination: February 17
Prenatal rubella testing: October 15
Preparation of plasma for coagulation testing: October 13
Protein contamination: September 13
RAST testing: October 13
Refractometer readings: November 15
Rh immune globulin: May 13, August 17, November 13
Rubella testing: February 13, October 15
Small-gauge needles: October 13
T_4 testing, dilution factor: December 13
Tourniquet application time: August 13
Toxicity, carbon monoxide: March 15
Urinary urea: April 17
Urine Gram stains: June 15
Urine, macroscopic analysis of: January 13
Urine odor: June 17
Urine testing: October 17
ZSR normal values: July 14

WASHINGTON REPORT INDEX

Hospitals face radical new cost rules. January 27
Lab groups must be wary of restraint-of-trade actions. February 27
HHS schedules latest—perhaps last—proficiency exam for October. March 27
Not many concessions in HCFA's final pathologist payment rules. April 27
Prospective payment zips through Congress, takes effect Oct. 1. May 27
CAP sues U.S. over "devastating" reimbursement rules. June 27
CAP loses Round 1 of reimbursement battle. July 27
FDA lifts restrictions on AFP test for fetal screening. August 27
Congress now shifts payment focus to independent labs. September 27
HCFA task force recommends national fee schedule for independent labs. October 27
Medicare poised to try competitive bidding for lab tests in '84. November 27
CAP vs. HCFA: What constitutes a pathology consultation? December 27 ■
